WORK EXPERIENCE

New York University | Brooklyn, NY | *Level 1 I.T. Technical Support Specialist*   September 2022 – Present
Reformatted and deployed numerous Window and Mac computers for office employee use. Created documentation for an internal asset management system. Provided stellar technical support to employees.

Software Development | New York, NY   September 2018 – Present
Conceptualized, prototyped, programmed, and distributed apps, including open-source apps, for Apple platforms. Contributed to numerous open-source projects for both Apple and non-Apple platforms.

- Released [Tides App](#), an app that allows watercraft users to view and determine high and low tide times for a specific location and specific point in time, including the user's current location and additional specified locations, on the Apple App Store.
- Released StickerCord, an app that allows users to use their favorite Discord emojis from their favorite Discord servers on iMessage and other social media platforms, on the Apple App Store.
- Released [Test Timer](#), an app that allows users to keep track of their time on practice AP exams based on the number of questions remaining, on the Apple App Store.
- Released [Low Power Mode Toggler](#), an app that allows Mac users to quickly access Low Power Mode through macOS's Menu Bar, on GitHub.
- Implemented a feature in which users could specify the due date and time of a reminder for Reminders Menu Bar.
- Helped to implement a better way of handling display scaling for OpenBVE.

Double Star Laundromat | New York, NY | *Advisor and Employee*   April 2013 – Present
Advised family business for strategic decisions. Provided exceptionally great customer assistance.

Lion City Coffee | Queens, New York | *Social Media Manager*   July 2022-August 2022
Produced and built a following for engaging advertising on social media using Adobe Photoshop and Premiere Pro.

SKILLS

- **Able to program in C, C++, C#, Python, Java, Swift, Lua, and Rust**
- **Created desktop, mobile, and web apps using Flask, HTML, CSS, SwiftUI, and OpenTK**
